Experience

Data Science & Analytics Projects

DevelopersHub Corporation - 2026

- Completed internship-level projects in EDA, visualization, classification, regression, clustering, forecasting and dashboard development.
- Built Python notebooks using pandas, NumPy, Matplotlib, Seaborn, scikit-learn, ARIMA, Prophet and XGBoost.
- Created a Streamlit dashboard to analyze 51,290 Global Superstore records using filters, KPI cards and visual insights.

Event Coordinator

Technoverse 4.0 | ACM CUI, Lahore - 06/2025

- Supported registration, venue setup and hackathon monitoring during the university technology festival.
- Assisted 50+ students with contest registration, instructions and query resolution.

Selected Projects

Global Superstore Dashboard | Python, pandas, Streamlit, Plotly

- Built a multi-page dashboard for sales, profit, customer, region and category analysis.

Household Energy Forecasting | ARIMA, Prophet, XGBoost

- Cleaned time-series data, engineered features and compared forecasting models using MAE/RMSE.

Mall Customer Segmentation | K-Means, PCA, t-SNE

- Grouped customers into segments using Elbow Method and Silhouette Score.

Python Automation Tools | openpyxl, docxtpl, argparse

- Built Excel-to-Word letter generation and rule-based file cleanup automation tools.

Java Dungeon RPG Game | Java, Swing, OOP

- Created a GUI-based RPG using interfaces, inheritance, custom exceptions and turn-based gameplay.

Education

Bachelor of Mathematics with Data Science

COMSATS University, Lahore

Relevant: Programming Fundamentals with Python, Multivariable Calculus

Expected Graduation 2029

Intermediate (F.Sc Pre-Medical)

Punjab College, Lahore | 2022 - 2024

Matriculation (Science)

Beaconhouse School, Lahore | 2020 - 2022 | 2nd Position in School

Summary

Motivated Data Science student with hands-on experience in Python, pandas, Streamlit dashboards, machine learning projects and automation tools. Interested in internships and junior data roles where I can turn raw data into clear insights and practical solutions.

Certifications

Introduction to Mathematical Thinking
Stanford University

Master Math by Coding in Python
Udemy

Skills

- Python, pandas, NumPy
- Data cleaning and EDA
- Streamlit dashboards
- Plotly, Matplotlib, Seaborn
- scikit-learn model building
- Regression and classification
- K-Means clustering
- ARIMA, Prophet, XGBoost
- HTML, CSS and Java basics
- API concepts and Git/GitHub
- Excel, Word and PowerPoint
- GHL funnels and automation

Strengths

- Analytical thinking
- Problem-solving
- Fast self-learning
- Team collaboration
- Clear documentation
